WORK EXPERIENCE:

Envoy LLC August 2015 - Present

Mobile Engineer (Android | iOS)

I'm working as a Mobile Engineer for Envoy LLC working on the Android and iOS versions of [Vizios' Smartcast Application](#).

Envoy LLC August 2014 - 2015

Senior Backend Engineer

I worked as a Backend Engineer for Envoy LLC creating custom API and integrated backend systems to support mobile and web front-ends. I'm currently involved in projects using Python, Django, Flask and projects using C# and ASP.NET as technology stacks.

International Business Machines (IBM) October 2012 - August 2014

Web Developer

Developer for the IBM Maximo/Tivoli Process Automation Engine. Duties included gathering requirements from customers to develop enhancements and customizations for the tool using mixtures of Python/SQL and Integrated UI Workflow. Personally developed and maintained an internal Python-CherryPy reporting website that translated, combined and centralized Business Objects reporting data from various customers' ticket-tracking systems. An invaluable resource for ISM/Maximo upper management who began using it as their primary resource for metrics shortly after it rolled out.

International Business Machines (IBM) July 2009 – October 2012

Web Engineer / Remedy Developer

Remedy Developer for BMC's Remedy Action Request system and the Web Engineer for Oracle Knowledge Management suite. Responsible for customization, deployment and maintenance of both systems for multiple clients. Developed enhancements for customers in Healthcare, Government, Retail and Technology industries.

Kaiser Permanente September 2008 - July 2009

Remedy System Administrator

Provided Application Support and System Administration for Kaiser's Remedy Action-Request System, a Crystal Reports reporting web application, and a user provisioning website written in PHP and SQL.

Kaiser Permanente June 2004 - August 2008**Service Desk Analyst**

Provided remote support for a wide variety of applications and systems to Kaiser employees. Established and led a dedicated VPN support team responsible for handling highly-technical calls. Managed high priority outage bridges responsible for triage and reporting to upper management.
