More Info & Projects: <http://josh.land> | <http://github.com/thingdeux>

WORK EXPERIENCE:

Versus Systems Jan. 2018 - Present

Senior Software Engineer (iOS | Backend API)

Responsibilities include creating and maintaining a proprietary SDK and API that is used for embedding physical rewards and prize distributions in video games.

Envoy LLC August 2015 - Present

Mobile Engineer (Android | iOS)

Working as a Mobile Engineer for Envoy LLC working on the Android and iOS versions of [Vizios' Smartcast Application](#). Apart from normal day to day duties of maintaining and adding new features to Smartcast I also take an active role in mentoring less senior developers and taking ownership of code quality in code reviews.

Envoy LLC August 2014 - 2015

Senior Backend Engineer

Worked as a Backend Engineer for Envoy LLC creating custom API and integrated backend systems to support mobile and web front-ends. Involved in projects using Python, Django, Flask and projects using C# and ASP.NET.

International Business Machines (IBM) October 2012 - August 2014

Web Developer

Developer for the IBM Maximo/Tivoli Process Automation Engine. Duties included gathering requirements from customers to develop enhancements and customizations for the tool using mixtures of Python/SQL and Integrated UI Workflow. Personally developed and maintained an

internal Python-CherryPy reporting website that translated, combined and centralized Business Objects reporting data from various customers' ticket-tracking systems. An invaluable resource for ISM/Maximo upper management who began using it as their primary resource for metrics shortly after it rolled out.

International Business Machines (IBM) July 2009 – October 2012

Web Engineer / Remedy Developer

Remedy Developer for BMC's Remedy Action Request system and the Web Engineer for Oracle Knowledge Management suite. Responsible for customization, deployment and maintenance of both systems for multiple clients. Developed enhancements for customers in Healthcare, Government, Retail and Technology industries.

Kaiser Permanente September 2008 - July 2009

Remedy System Administrator

Provided Application Support and System Administration for Kaiser's Remedy Action-Request System, a Crystal Reports reporting web application, and a user provisioning website written in PHP and SQL.
